

Sakshi Jha

✉ sakshijha2003@gmail.com 🎓 CSE Student | Interested In AI, Web Dev, Entrepreneurship

SUMMARY

I solve problems creatively. While pursuing my diploma at Kasturba DSEU, Pitampura campus. I have learned that modern problems require modern solutions. I am someone who is always craving for learning new skills and love to implement them in real life. I am passionate about technology, which led me into this field. I learned basic C language, HTML, CSS, and MS Office 365, which includes Excel, Word, and Powerpoint. I have knowledge of DSA and full stack development, and I intend to become Full stack developer, but may change my field in future as I am inclined towards learning new things. As well as career aspects, I'm also a member of NCC, which taught me many valuable skills and lessons. I enjoy playing outdoor games and taking slow walks by myself.
